you know what is funny
about the demons

is DYZ19

is attached to gender and genital devoment

so no wonder

they are into the 72 genders

they have their fucking genome for genitalia and gender fucked with

okay

when i put it together

the DYZ system

you shall see it all!

you have mutants

they are demons

they are democrats

they are non-homo sapien

they are neandrathal % ancient genome

Do not let them tell you

None of this matters.

If none of his matters.

Why are the DYZ19 mutants in power?

I want them removed

I do not care if they are mutated

A mutation cannot govern Earth

The DYZ19 will tell you it does not matter.

DYZ19 will self destruct it's own power.

It will leave only one thing

A leader. The false prophet.

```
To carry on the mutant family.
Do not
Let them breed
kill
the
mutants
use military
do not act alone
wait
for your Armed Forces
to open District 9 for these mutated jewish fucks and their nasty ass deleted genome whsit
wahtever
i would fix them
but
they dont even want to fix themselves
so
fuck it
if there is tech
fix it
if there isn't
open the fucking over doors
or
the volcano
fuck the oven
who needs and oven?

]just go old school and push them in the magma
```

```

Good question
Yes
I did bring it up
But for some reason
it does not speak of % denisovan either
I will tell you this

% denisovan is not the ruling class
sooo
it is what it is
but you are right
I dont know everything, but I act like it

I have not heard of this group, so thank you.

I think there are a couple, pygmy style groups that come from the region and I didn't know that before.

you have pygmy bantu and pygmy maori

and then you have new -zealand and maybe haplogroup S the aboriginal?

and you have the haplogroup Q which moved from polynesia to hawaii also south america
follow the sweet potato around the globe to find the Q line

I think it is important because all the hawaiins are super important right now.
people think that pygmy is ancient adam

however

Look at the ancient click languages of the khoerkean or something. I didnt spell it right. type in click language and 138 sounds and it will pop up
anyway. these south african early man
SPECIFICALLY identified they are non-bantu
they did not say we are we and that is all
they say <non-bantu>
as if that is the other
cause I have pygmy bantu
but not pygmy maori
and i was under impression at first
this is adamic blood
it is not
i have hazda blood
I dont know much about it
I just know I am of Adam in some way
I just need to
```

put together what I know to prove it to you
so people do not judge me too much
as I judge others
for people not of hazda or early man

but if you want to see hazda
that is the only adam i can find in me
and it runs at 0.2%
compared to like 2% pygmy bantu, which would be like 1/2 of real pygmy before it got a 11 spliced up
i am also like 2.5% neandrathal
soo 1.5% ashkenazi or so
I have 1/2 the scottish blood of my mother
and she has no ancient adam

hope that helps

If you look at Q haplogroup Q
you can see it emerge from a crater in siberia

if you look at haplogroup O
you will see the tiip of india
and i am guessing that is Temuria
and the ring of fire
is from some massive exploding
related to .. ancient times
and now there is some fucked up messy stuff in the oceanic region from it

the same with india
why do they fight over the border of pakistan and india?
i actually do not know
but there is a bloodline there and it is only there

who are the saudis?
why are they .. different than other arabs

what is a persian?
what is iranianan?

who is esau?
cain?
able?

cain was a farmer
able a shepherd
esau a red man, the aboriginal called the red man yowie, they were blood sucking vampires that lived in the trees and had red skin

look
i can talk myth all day
if you want to know about
the dravidians
if they rae who i think
i didnt look
just guessing

Check out Chromosome 17
it impact haplogroup Q maybe [17duh]
anyway
Check this out
if you do wiki chromosome 17
it will be right there called homeobox
it is all it regulates
look what it does..
you grow feet on the head as antennae

funny
how
this stuff is scientific and part of DNA in some way
not part of 23 chromosome DNA
but it is there
in some degree
was day 1 a single
day 2 a double
day 3 a 5 chrom
day 4 a 10 chrom
day 5 a 17 chrom
day 6 a 23 chrom

i can tell you 5
not well
but just what i glanced at

it impact non-vertebrates
5 is your snake
5 is DY219 mutation from interbreeding with non-homo-sapient
i just ..
started all this chromosome shit a couple days ago
and i still am in over my head

rather grab some peoples attention to look at it then try to uncover myself

like. shit. you all want to talk about ET and % blood of stuff

here take the science to go with it

so you do not sound... uniformed on the issue

many people can KNOW through myth and religion and stuff
but

to have the chromosomes and the sequencing to <prove> and know
and be factual about stuff

and not look like a >crusade< against...
difference

there is difference and there is DIFFERENCE

i want to know

what is DIFFERENT

and what is different

i can live with difference

i cant live with DIFFEERAENCEN JAESFE

whatever

that shit is

i jsut wanna know

that it is

in there?

like

it has soul..

It would help to have a better comprehension of your purpose here first. Maybe some faggots will want to help then.

Okay. I think this is what all the shit is about over in teh India/Pakistan border and all the crap with teh Saudi right. Cause saudi are J

anyway. i went to check out dravidians..

here is a list

the earlier the <letters>

the earlier the people

this burusho people

have no letters

tehy are isolate from all those other groups somehow

but you will see the originals

at AA

and then AA, DD

and so on

https://en.wikipedia.org/wiki/Y-DNA_haplogroups_in_populations_of_South_Asia

https://en.wikipedia.org/wiki/Burusho_people

when you start

getting a map of all the letters of the alphabet

just remember

each one

has a bloodtype

pick a letter

see where it disbrubtes too

find the <point of origin>

it reveals...

genetics that ..

appear from thin air

and become

natufians of washington DC

isnt that odd

that washington DC has bloodtype E at 40% of the population

no other state

bloodtype E is from africa and the natufians, an ancient skull worshipping people from the middle of africa that turned white as the Moors before crossing from germany to england as warriors for william the Conqueror and thus breeding onto the isles

where do you think that famous last name, the moore come from?

it is more than a swamp

check out melungeons
check out the relationship between melungeon and scotland
see language
see genetics
see scotia

now
type in haplogroup X

tell me

does that come from egypt.
with scotia to scotland
and land in nova scotia

now tell me this

WTF are all those damn haplogroup planet X people doing up there in the northeast?
and why

do they have pharaohs blood from the masons who left egypt to become free masons and left britain to become free americans.
why am i under british rule again?

fuck you all

if you are the founding fathers, of the freemason, of the mason, of the pharaoh

let me go
give back the fucking country

you have been getting away forever from that % shit

now stop

give me control

and remove the % bloodline power

FOREVER

if you are %
and you are in power

you are the problem

not the solution

First off I never said the word spam. Second I wasn't bitching about anything. Third and again, I'm asking what the purpose of you posting this information in this form is. It's not very coherent in this format and it's hard to follow. If you don't want help with this research than why post it here incessantly? I've developed a strong intuition over these past three years. I've gotten pretty good at listening to that little voice. I think you might have something here and I might be willing to help if you can succinctly explain what it is you're trying to accomplish.

I am trying to be nice.
You may have a DY219 mutation.
You do not make sense
Listen
[]
You are fighting a criminal cabal, yes?
I have identified the associated blood types, okay?
I have determined there may even be a mutation or genome deletion associated with the blood types, fair enough?
Now.
I do not understand what is confusing to you.
Why would I not post this here?
What is incoherent specifically, I can spell it out better maybe. I just want to help you figure out that this is relevant.
I do want help, I was just telling people I was on to something and check it out. I hope people think it is really interesting.
Look at Chromosome 17, the homeobox regulator, it makes you grow antennae on your head.
Now. You say you have a strong intuition from being here 3 years.
How do you not think bloodlines are important?
Do you know about non-homo sapien bloodlines and ancient DNA that is related to the ruling class that you fight?

I am just telling you.
I am making sense to myself.
I think I am making sense to other people.
I dont know what you are confused about.
After 3 years.
You don't believe in the illuminati and the pharaohs?
Did you not see the story of Scotia?
Google Haplogroup X
It is right there.

Here is the problem

I spend time, typing all this, asking specific and very direct questions. Please. Just answer one of them directly. Say something content related that indicates you have looked at Haplogroup X map. I posted it in this bread and it is available on the internet

I can also tell you
That American Republicans
Have a Chromosome 17 mutation sometimes.
You don't want to hear that .
I personally have a Chromosome 6 mutation. I have schizophrenia.
Okay.
I don't know what all this is.
I find it fascinating.
I find it disconcerting if you are unable to address your origins appropriately.
You all have % blood from inner-outer Earth of some type.
I do not know what it means to be, not, of Adam.
I have ancient Hazda man in many, I have bantu pygmy, and I have north african.
If you know what those 3 things me.
You can understand I have blood from you all to some degree.
It is just that DNA has <expression>
Just because you come from a being that had a mutated Chromosome 17
That does not mean you experience non-23 chromosome.. whatever, now.
I dont know about Chromosome 17 mutations or expressions yet.
Are there good Q and bad Q?
I am sure there are.
I have spoken of it before.
Beware of Q-
It looks like Q
but it is not you.
In the same way.

I don't care if people experience thought or their lives different.
I don't care you are ET and you know it.
I dont care if you have % whatever.
I dont care if you have antennae
or scales
I just care that you don't <rule my genetics> from a mountain top of your own.
I do not care if any genetic sits on the mountain of money and power.
Just don't abuse it.
Do not oppress
Do not enslave.
Based on a % DNA
The problem arises when there are % DNA expressions or mutations.
The being is unable or unwilling to address the issue on any level.
It may literally be incapable.
It is difficult to know what is right under those circumstances.

Then there must be a communication mismatch here. I do think this is interesting. I do think this is important. I do think this is relevant. But if you haven't noticed, most people are just ignoring you perhaps filtering you. Do you want to make a chart or map of all the genes/haplogroups based on geographic migration in history and families? what exactly is your goal? I know history and bloodlines is important. It might even be the key to it all. I think there's being not of earth origin involved here. But you don't seem to be making much headway in engaging anons. Maybe this isn't the best platform? It's a pretty specific topic. I bet if you made your own Discord server or something you would have some that would want to contribute. I never thought of it as a positive vs negative polarity before. I was going to note how it really spikes during an intense yes / no personal decision you are about to make before you posted. I would advise caution in putting info like this out there though, specifically because of the glow sticks but also it could potential open doors in a normal person's life that they aren't prepared to walk through.

I am not advocating hiding anon, only that many are not remotely ready to comprehend things outside of what they consume on social media. I would venture a guess that there are quite a few anons with various sensitivities lurking in the background. Maybe just watching, maybe scared to admit it or maybe they have never tried to understand it. Despite the amount of bullshit in the bread, the conversation about the ringing immediately drew my attention. I knew it couldn't possibly be only me experiencing it (very intensely), but hadn't seen it brought up so it stood out immediately.
