Needs "in the context of meaningful and transparent mitigation action" at the end.

Pasted below if you can't open:

24. Climate change is one of the greatest challenges of our time. We recognize that 2015 is a critical year that requires effective, strong, immediate and collective action on climate change and its effects. We affirm our determination to adopt a protocol, another legal instrument or an agreed outcome with legal force under the UNFCCC that is applicable to all Parties. This agreement must be balanced, effective, transparent, dynamic and durable. It should be in line with holding the increase in global average temperature below 2°C above pre-industrial levels. It should also promote the long-term transition of all countries towards low greenhouse-gas economy. We welcome that over 160 Parties including all G20 countries have submitted their Intended Nationally Determined Contributions (INDCs) to the UNFCCC, and encourage others to do so in advance of the Paris Conference. We are prepared to implement our INDCs. We recognize the importance of fulfilling the commitment by developed countries to the goal of mobilizing jointly USD 100bn per year by 2020, from a wide variety of sources, both public and private.

Agreed, that sounds a good strategy

find attached our proposal (I'll send the punchy sentence the M asked for concluding later: suggestions welcome!)

let me know what you think before we approach the others
